

Our family's journey began in 1933 during the height of *The Great Depression* when our Great Uncle Les desperately searched for some relief for his wife's arthritis pain.

After much research and formulations from his rural Ohio farm, Uncle Les discovered a unique essential oil formula that helped bring relief to his wife's suffering. Word quickly spread and his Medicated Salve became a *must have* for all of his neighbors and the surrounding Mom & Pop country stores.

Today, our family still manufactures the Medicated Salve, using the same time-honored process and ingredients. A line of additional products has also evolved that help to solve pain relief problems. All of our products use natural active ingredients and are still manufactured by our family in our own facilities, now in beautiful Wyoming.

We still create our products for people from every walk of life. From active lifestyles to hard workers, we have products that will help to make your life more pain free and pleasant. You will also notice that we've kept our prices affordable for most budgets.

Like you, our family is always looking for value at affordable prices as well. We welcome you to our company and invite you to share in the unique quality and effectiveness of all our products.
